

Jay Shekhavat

AI and ML Engineer || GenAI || Innovative Problem Solver

Dynamic AI and ML Engineer with expertise in developing scalable machine learning models, deep learning architectures, and AI-driven solutions. Committed to engineering robust algorithms that transform data into actionable intelligence and solve real-world problems through innovative AI applications.

WORK EXPERIENCE

Data Scientist Trainee Mark Exhaust System LTD

02/2024 - Present

Gurugram India

"Skilled AI and ML Engineer specializing in data preprocessing, model architecture design, and deployment of machine learning pipelines. Proficient in optimizing AI systems for performance, scalability, and reliability to meet engineering and problem-solving requirements."

PERSONAL PROJECTS

Resume Parser and Screener (10/2025 - 10/2025)

- Develop an AI tool that parses resumes (e.g., PDFs) to extract skills, experience, and scores candidates against job descriptions. Use NLP for keyword matching and ranking.
- Tech: Python, NLTK, spaCy, scikit-learn. Impact: Improved hiring efficiency by 30% in simulations.

Multi-Modal RAG System for Document Search (09/2025 - 09/2025)

- Build a retrieval-augmented generation (RAG) system that processes PDFs, images, and text to answer queries intelligently.
- Tech: LangChain, vector databases (e.g., FAISS), multi-modal LLMs like GPT-4o.

Brain tumor Detection Project (08/2025 - 09/2025)

- Developed a deep learning-based model using CNNs for accurate brain tumor identification from medical images, focusing on model training and inference optimization.

Diabeties-status-prediction-project (07/2025 - 07/2025)

Image-Classification-Project-CNN (06/2025 - 07/2025)

Twitter-Sentiment-Analysis-Project-NLP (05/2025 - 05/2025)

Movies recommendation project (04/2025 - 05/2025)

EDUCATION

BTech (Information Technology) AKTU University Lucknow

07/2019 - 06/2023

Bijnor (UP)

Class IIX S.R Inter college

07/2015 - 05/2017

Firozabad (UP)

Class X S.R Inter college

07/2014 - 05/2015

Firozabad (UP)

SKILLS

Programming & Frameworks: Python, Flask, FastAPI

AI/ML Technologies: Machine Learning, Deep Learning, NLP, TensorFlow, Keras, OpenCV, Langchain, RAG, GenAI

Data Handling: Scikit-learn, SciPy, NumPy, Pandas, Matplotlib

Databases: SQL (MySQL, PostgreSQL)

Web & Visualization: HTML, CSS, JavaScript, Tableau, PowerBI

Other: Advance Excel (VBA, Macros)I

CERTIFICATES

Full Stack Data Science and AI (AlmaBetter) (06/2023 - 06/2024) (06/2024 - 02/2025)

Comprehensive program covering end-to-end AI and ML engineering, including data pipelines, model development, deployment with TensorFlow, and cloud integration. Hands-on projects prepare for roles in AI engineering and deployment.
